Installation Instructions

1. Your new Tusk Spare Tire Carrier will be installed just above the shock canisters on the two roll rear cage tubes .
2. First remove all other accessories that may interfere with the installation.
3. Loosen all eight bolts that secure the two rear roll cage tubes, do not remove them. **(See images below)**
4. Install the Tusk Spare Tire Carrier onto the two roll cage tubes, slide it down to approximately 1” from the top of the shock canisters.
5. Install the two supplied roll cage clamps using the (8) supplied M8 Cap screws and tighten. **(See image below)**
6. Using four lug M12 x 1.5 lug nuts (not supplied) install your spare tire/wheel (not included) onto the four lug studs with the wheel facing up.
7. Enjoy your new Tusk Spare Tire Carrier.
